This chart shows a sharp increase in cases starting in mid-April, reaching a peak of approximately 2.0 cases by early May. The data is represented by a solid blue line, with a shaded blue area indicating the confidence interval. Vertical dashed lines mark the dates of the first, second, and third waves.

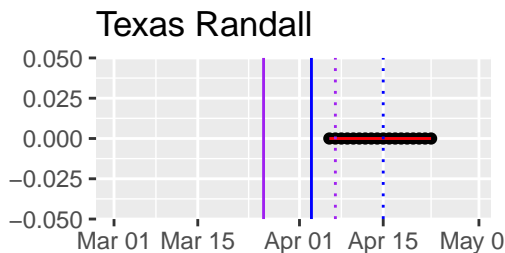

Mississippi Rankin

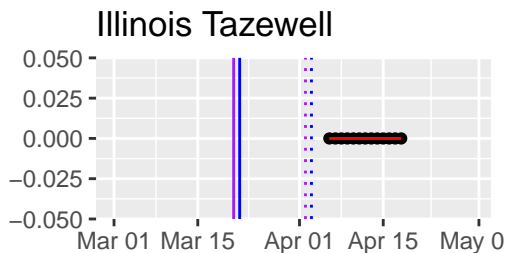

Maryland Washington

The chart displays the vaccination progress in Washington, D.C. The x-axis marks the dates Mar 01, Mar 15, Apr 01, Apr 15, and May 01. The y-axis shows the percentage of the population, from 0.00 to 1.00. A solid purple line represents the estimated vaccination percentage, which rises sharply from March 15 to reach 1.00 by early April. A shaded purple area represents the confidence interval, which is very narrow and stays near 1.00. A red line with circular markers represents the daily vaccination rate, which also reaches 1.00 by early April.

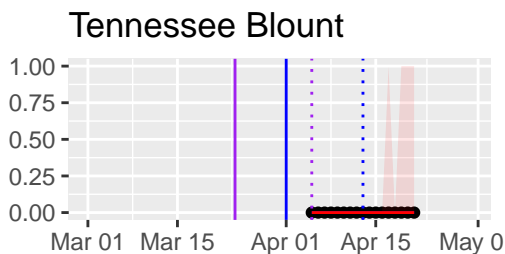

North Carolina Orange

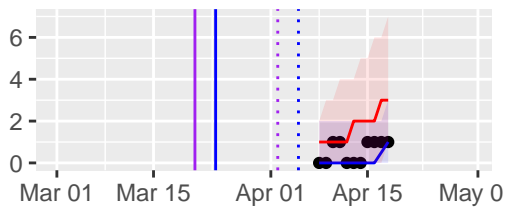

The chart for North Carolina Orange shows a significant price increase starting in late March. The price reaches a peak of approximately 1.00 in early April and then fluctuates between 0.75 and 1.00 through May. The data points are represented by blue dots, and the price is generally higher than in the previous period.
